New Company Alert

Company Name: rtCamp

About Company: Rooted in a passion for open source, rtCamp began as a blog network in the mid-2000s, evolving into a globally recognized WordPress VIP Gold Agency partner. Officially incorporated in 2009, we committed ourselves to engineering excellence, anchored by WordPress expertise and a detail-oriented approach.
Looking ahead, rtCamp remains steadfast in our promise: to be the partner that not only solves problems but is invested in the journey of our clients' success.

For more info: https://rtcamp.com/about/

Education Qualification: IMCA / MCA / MSc. (IT) / New LJIET

Eligibility Criteria:

1. Active GitHub profile showcasing your coding skills
2. Solid understanding of computer fundamentals.
3. Shortlisting will be based on **open-source contributions on GitHub**, specifically quality pull requests (PRs) to well-regarded projects.

4. PRs to:
    - WordPress
    - Frappe
    - React
    - PHP, JS, Python repos with 10K+ stars

1. **What we'll exclude:**
    1. First Contributions
    2. Repos with just README files or list-style content
    3. Non-code contributions

2. **Note:** Low-quality or rejected PRs will be negatively ranked.

Job Profile: Associate Software Engineer

Job Role Description: We are looking for PHP, MySQL, HTML, CSS and JavaScript developers and train them to build web solutions using mainly WordPress CMS/framework for our large enterprise clients such as Google, Facebook (Meta), IndianExpress, Penske Media and Al Jazeera, which millions of people use daily.

This role offers hands-on experience in web development, focusing on front-end design and back-end implementation.

Key Responsibilities:

- Deliver secure, scalable, and easy-to-maintain WordPress solutions using engineering best practices and relevant coding standards.
- Write clean, optimized, readable, and reusable code along with test cases for all the code you develop for easy maintenance.
- Write and maintain technical project documentation, including inline code commenting, GitHub repo README, and clear commit messages.
- Deliver high-quality plugins and design responsive themes with great attention to detail.
- Able to understand project/client requirements and deliver effective solutions.
- Manage time well and focus on details to meet deadlines.
- Prioritizing to meet deadlines and maintaining proactive communication is essential for effective collaboration within our remote team.

Must Haves:

- Solid understanding of web development fundamentals, including HTML, CSS, JavaScript, and MySQL. Especially JavaScript.
- Proficiency in PHP syntax, databases, OOP, debugging, and frameworks.
- Familiarity with version control software such as Git for collaborative development.
- Knowledge of basic architectural concepts relevant to web development, including background job processing.
- Strong problem-solving skills and the ability to learn new technologies quickly.

Good to Have:

- WordPress plugin and theme development proficiency.
- Familiarity with front-end technologies: Gutenberg, FSE, React.js, Vue.js, AngularJS.
- Knowledge of package managers like Composer.
- Experience with web servers such as Nginx, Apache.
- Understanding of unit testing frameworks.
- Adherence to coding standards and best practices.
- Experience in contributing to open-source.
- Basic knowledge of hardware (CPU, RAM, Motherboard, etc.) for a hosting server.

Benefits:

- Work From Anywhere
- Open Source
- Health Insurance Coverage
- MacBook on Joining
